<p>Resumo (objetivos, atividades e resultados esperados) - em PT e/ou EN:</p>	<p>1. The mapping of the sport sector employers. The aim is to map all the employers of different types, sizes or status operating in the three subdivisions of the sport sector (Not for profit, Professional and Active leisure).</p> <p>2. The assessment of the current situation. This second part aims to assess the current situation of the sport sector within the national field. A first focus must be done on the representation of sports interests (eg: lobbying actions), before tackling the existing legal framework (national sport laws, collective national agreements on sport, etc). Finally, this part could identify stakeholders who would be interested in taking part in the creation of a representative association of sport employers.</p> <p>3. The survey about representativeness of the sport sector. This final part is the survey that you will have to send to the stakeholders identified by the mapping. The goal is to ask questions to those stakeholders to make them aware of their needs and of possibilities and solutions that social dialogue could provide them with.</p>
