# HUPEDCARE

The Universities of Africa, Latin America, and Europe recognize the necessity to modernize academic and professional training processes, necessitating an extensive use of information and communication technologies (ICT) and a flexible curricular structure incorporating contemporary subjects such as the Humanisation of Pediatric Pain Care.

## PROJECT OBJECTIVES:

- ➔ To generate knowledge about the humanization of pediatric pain care and to build 7 Technology Learning Centers in Humanisation of Pediatric Pain Care (PedTECH centers) in institutions in Africa, America and Europe.
- ➔ To create an online PedCARE platform to share innovative materials and tools for learning about the humanization of pediatric pain care.
- ➔ To disseminate all knowledge at all academic and non-academic levels.

# PROJECT WORK PLAN

It will be conducted within the higher education community in Health Sciences, including professors and students from 15 different universities and the non-specialized community.

The objectives will be achieved through work packages which are sets of interrelated tasks.

1. Project management and coordination, brand creation.
2. Analysis of the global situation of attitudes, beliefs, and knowledge regarding the approach to pediatric pain and its humanization.
3. Creation of the PedCARE platform.
4. Develop capacities in the field of humanization of pediatric pain management in healthcare, professional, educational, and community settings.
5. Development of online content for the PedCARE platform.
6. Creation of technological learning centers within the HUPEDCARE framework, called PedTECH, in Africa and the Americas.
7. Quality control and monitoring.
8. Promotion of HUPEDCARE.
9. Exploitation of project results and sustainability mechanisms.
